

YOUNG WOMEN MAY AVOID PAIN

Need Only Trust to Lydia E. Pinkham's Vegetable Compound, says Mrs. Kurtzweg.

Buffalo, N.Y.—"My daughter, whose picture is herewith, was much troubled with pains in her back and sides every month and they would sometimes be so bad that it would seem like acute inflammation of some organ. She read your advertisement in the newspapers and tried Lydia E. Pinkham's Vegetable Compound. She praises it highly as she has been relieved of all these pains by its use. All mothers should know of this remedy, and all young girls who suffer should try it."—Mrs. MATILDA KURTZWEG, 529 High St., Buffalo, N. Y.

Young women who are troubled with painful or irregular periods, backache, headache, dragging-down sensations, fainting spells or indigestion, should take Lydia E. Pinkham's Vegetable Compound. Thousands have been restored to health by this root and herb remedy.

If you know of any young woman who is sick and needs helpful advice, ask her to write to the Lydia E. Pinkham Medicine Co., Lynn, Mass. "Only women will receive her letter, and it will be held in strictest confidence."

CO-OPERATIVE BUYING OF FERTILIZERS ESSENTIAL

Farmers Are Asking Everywhere, "How Much Can We Afford to Pay for Phosphate?"—If We Buy Singly We Pay the Highest Price.

(By J. C. McAmis, Division of Extension, University of Tennessee.)

The price of phosphate fertilizers has gone sky high. It is retailing in many places for \$28.00 per ton and over. Farmers are asking everywhere, "How much can we afford to pay for phosphate?" It depends upon conditions.

Experiments and field practice has simply proven that phosphate can be used under average conditions with a greater chance of profit than any of the commercial fertilizers. Soils and crops which are in need of the element phosphorus will justify \$20.00 per ton for acid phosphate. We can afford to pay it if we must. But must we? Phosphate must be used, but is it necessary to pay \$20.00 for it? If we buy singly we pay the highest price; if we buy collectively we have every advantage in buying at the lowest price.

One hundred Knox county farmers bought collectively during the past year 110 tons of acid phosphate at \$14.90 per ton, when it was retailing to individuals for \$17.50 per ton. There was an actual saving of \$2.60 per ton. Besides, the fertilizer was delivered in car load lots to the nearest railroad station. Instead of having to haul it by wagon from Knoxville, it is estimated that they saved 1,600 miles haul, which was an even greater advantage than the reduction in the first cost.

The first essential in such co-operative relations was mutual confidence. They obtained it by a frank, open discussion of the phosphate problem. They determined the amount that they needed and agreed upon a spokesman who should correspond with a number of wholesale fertilizer dealers and obtain their bids.

It would seem to be a more profitable thing to launch and "put over" such an enterprise in a community than to quibble about the chance of profit or loss from the use of phosphate. It is a necessity if it is deficient in the soil.

CALOMEL DYNAMITES A SLUGGISH LIVER

Crashes into sour bile, making you sick and you lose a day's work.

Calomel salivates! It's mercury. Calomel acts like dynamite on a sluggish liver. When calomel comes into contact with sour bile it crashes into it, causing cramping and nausea.

If you feel bilious, headachy, constipated and all knocked out, just go to your druggist and get a 50 cent bottle of Dodson's Liver Tonic, which is a harmless vegetable substitute for dangerous calomel. Take a spoonful and if it doesn't start your liver and straighten you up better and quicker than nasty calomel and without making you sick, you just go back and get your money.

If you take calomel today you'll be sick and nauseated tomorrow; besides, it may salivate you, while if you take Dodson's Liver Tonic you will wake up feeling great, full of ambition and ready for work or play. It's harmless, pleasant and safe to give to children; clear the it.

GIVE LIVE STOCK GOOD SHELTER

Tennessee Farms as Well as Northern Farms Need Well-Made Buildings

GOOD BARN BRING PROFIT

Tight Barns, However, May Be Worse Than No Barn at All for They May Increase Disease—See That Buildings are Well Ventilated.

(By C. D. Lowe, Division of Extension, University of Tennessee.)

Observations made over this state indicate that our live stock shelters are largely of the two extremes—that is, none at all, or too costly character. Of course the latter class are few in number.

Somehow most of us have had the idea that because we lived in "Sunny" Tennessee, our live stock needed no shelter and that such things were for the up-north stockman. Never were we more mistaken.

The prime necessity for live stock shelter is not so much for protection against extreme cold, as many believe, as against cold rains, sleet and soft snows. Sufficient feed of the proper constituency together with heavy winter hair-coats of animals offer enough resistance to mere dry cold in any temperate climate.

Our winter rains, sleet, etc., are heavier and more frequent than in many sections of the North. Therefore, we do need the proper kind of shelters, more, even, than many northern locations.

However, the protection needed is inexpensive. Anything that provides a waterproof overhead covering and breaks side-drafts is sufficient. Such conveniences may be found in mere open sheds with roof, and one side and one end boarded up leaving southern exposure open. Such structures need only to be sufficient size to accommodate the stock while eating their feed. It is also necessary to give some attention to the conservation of the manure. Retaining walls of concrete or even solid concrete floors in feed-lots are often advisable.

Tight barns or poorly ventilated barns are perhaps worse than none, since it is now evident in many places that such structures have become simply incubators for diseases as tuberculosis.

Good barns will make surer the health of the animals. The Division of Extension, of the University of Tennessee, Knoxville, is studying the building of barns. The Division is at the service of any citizen in the state who writes in his questions.

CLEANLINESS FOR CHICKENS

(By R. N. Crane, Division of Extension, University of Tennessee.)

The inside of the poultry house should be a clean place. It will require careful attention and some work, but results will pay for the effort. Paint the perches at least once a week with crude oil, kerosene, or some good lye paint. This will hold in check vermin. Twice a year thoroughly whitewash the inside of the house. The outside should be kept well stained, painted, or whitewashed.

HIGH PRICED MAY LAMBS

Wilson County Is Doing What Many Counties of Tennessee Could Do

GET A FLOCK OF SHEEP

State Now Has Only 800,000 Sheep Where It Should Have Several Times That Number—Tennessee Needs a Few Sheep on Each Farm.

(By C. A. Keffer, Division of Extension, University of Tennessee.)

County Agent W. K. Tipton, of Wilson county, reports that the Baird's Mill Lamb Club sold its lambs for delivery in Lebanon, May 30, at eleven and a half cents a pound.

That fact should set every farmer in Tennessee to thinking.

A West Tennessee farmer owned 19 ewes last winter, from which he raised 80 lambs. This is far above the average, but put these two facts of high price and high possible production together and nothing in the whole range of agriculture is richer in suggestion to the farmer.

In the eleventh census every county in Tennessee but one reported some sheep, Wilson county leading with 56,806 and Bedford county second with 56,598; Maury, Williamson, Lincoln and Sumner counties following, each having over 40,000. Obion county led West Tennessee in sheep production with 14,668 and Hawkins headed the list of East Tennessee counties with 10,554. The total number of sheep in the state was 795,033.

Wilson county farmers got eleven and a half cents a pound for lambs sold in May.

These lambs were raised largely on pasture. The pasture was the fall-sown fields and crimson clover. In the case of the grain the fields were not pastured close enough to interfere materially with the grain crop. The manure about made up for the possible shortage in grain yield. The crimson clover can be followed by a summer crop of corn or beans. The flocks that were fed received at most a small grain ration.

Eleven-cent lambs is enough to make the farmer dream dreams and see visions; enough, one would think, to induce him to realize the dreams and visions in practice on his farm.

Dogs? With lambs at eleven cents, and wool at present prices the farmer certainly can afford to take care of the dog evil.

Study the matter thoroughly this summer.

Get ready for sheep by planting small grain and crimson clover pasture.

Start with a small flock. Protect them.

Instead of 800,000 sheep Tennessee should have millions.

Lax-Fos, A Mild, Effective Laxative & Liver Tonic

Does Not Grip or Disturb the Stomach. In addition to other properties, Lax-Fos contains Cascara in acceptable form, a stimulating Laxative and Tonic. Lax-Fos acts effectively and does not gripe nor disturb stomach. At the same time, it aids digestion, arouses the liver and secretions and restores the healthy functions. 50c.

Stop Those Sharp Shooting Pains "Femenina" is the wonder worker for all female disorders. Price \$1.00 and 50c. 11-1

Nothing Bad Can Get In— Nothing Good Can Get Out

"Silver Moon's" bright, clean parchment paper wrapped tin can, is the coffee lover's assurance of undiminished good quality. Nothing harmful can get to the coffee nor can any of the sweet aroma escape.

If you love coffee richness, delicacy and full flavor, order

SILVER MOON COFFEE

—combining the goodness of five fine coffees in such proportion that the best of each adds to the excellence of all.

"Feather-light"—that describes the cakes and biscuits you'll make with Silver Moon Baking Powder—a pure phosphate powder free of alum. 25 cents per one pound can.

Each Silver Moon package contains a coupon, good to apply on a pound box of Silver Moon Chocolates or Oneida Community Reliance Plate silverware.

Oliver-Finnie Co., MEMPHIS, TENN.

Makers of delicious Debutante Chocolates and 514 other famous sweets.

Silver Moon products are sold by all the best dealers in pure food products in Somerville and adjacent territory.

TANLAC WEEK

THIS IS TANLAC WEEK—And over Eight Thousand Tanlac Stores Will Join in Celebrating The Second Anniversary of Its Wonderful Sale—Fame of Celebrated Medicine Spreads over Whole Nation Like Great Tidal Wave and it is Now Sold From Coast to Coast.

This is Tanlac week and over Eight Thousand of the leading dealers of the country, who are agents for Tanlac will join in celebrating the second anniversary of the greatest selling medicine of all time.

Everybody has heard of Tanlac and the wonders it has accomplished. Everybody has also heard of how hundreds of thousands of suffering men and women have been restored to health and happiness by its use.

From coast to coast and from the Gulf to the Great Lakes Tanlac is known and honored. Millions have taken it and have pronounced it the greatest medicine that has ever been given to the people. No matter where you go is a household word and it is now unquestionably the most widely talked of medicine in the world today.

Although placed on the market a little less than two years ago over Seven and a Quarter Million bottles have been sold, and its record as a seller has probably never been equalled in the history of this country.

In six Southern states alone, Tennessee, Georgia, Florida, Alabama, Mississippi and Aarkansas, Tanlac is now selling at the phenomenal rate of over a million bottles per year and the demand is constantly increasing. Through the Atlanta office over eighty carloads have been sold and distributed since last October.

Tanlac dealers in practically all the larger cities of the South are now buying it in carload lots and right here in your home town, The,

RHEA DRUG COMPANY

Has Sold Since Dec. 21, 1915

Over 600 Bottles

If you want to know more about Tanlac just ask this well known firm! They will tell you it has not only proven the greatest seller but that it has given the best satisfaction of any medicine they have ever sold and that they are today selling more Tanlac than any other six medicines put together. They will also tell you of scores of people right in your community who have been benefited by its use. Ask your neighbors about it and they will tell you the same thing.

Tanlac is composed entirely of roots, barks and herbs and contains no minerals or harmful drugs as do many other medicines. The ingredients, or medicinal elements which make Tanlac come from remote sections of the earth

—the Alps, Pryenees, Russian Asia, Jamaica, Europe, Brazil, West Indies, Mountain States near the Rocky Mountains, Asia Minor, Persia, India, Mexico, Columbia and Peru, contribute the principal properties of the preparation

Tanlac aids the natural digestive process through its prompt though gently corrective action; bodily nourishment is derived through the proper assimilation of wholesome food. If you are weak, run-down and debilitated and need a good tonic and system purifier try Tanlac, and you will add your testimonial to the thousands of others who have been restored to health by its use.

Tanlac is Sold in Somerville Exclusively by the Rhea Drug Co.
